The image shows a screenshot of the Chrome flags page in a browser window. The address bar shows 'chrome://flags'. The page lists various experimental features. Two callout boxes with blue backgrounds and white text provide instructions:

- 2** En SameSite by default cookies, deshabilita el parametro, seleccionando: "Disabled"
- 3** En Cookies without SameSite must be secure, deshabilita el parametro, seleccionando: "Disabled"

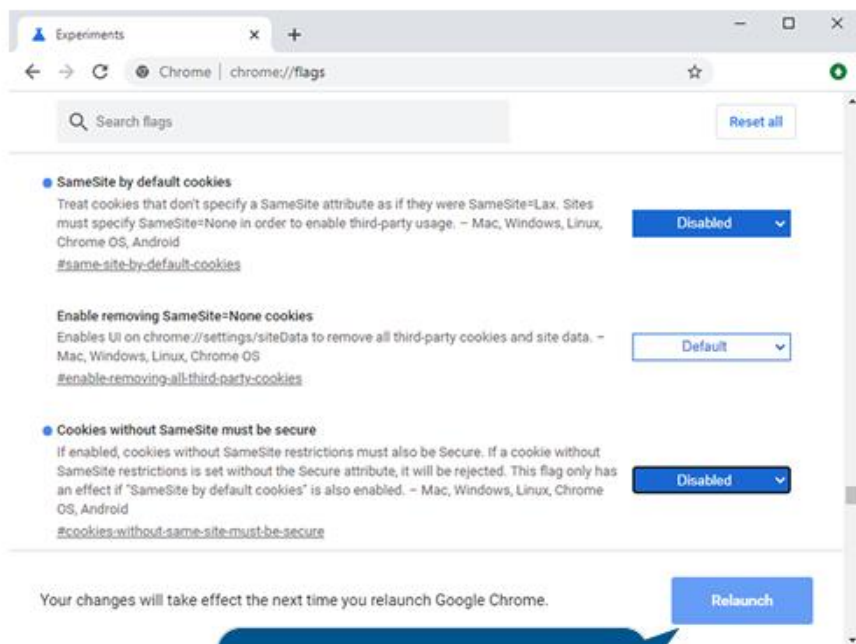

The screenshot also shows the following text for the flags:

- SameSite by default cookies**  
Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android  
[#same-site-by-default-cookies](#)
- Enable removing SameSite=None cookies**  
Enables UI on chrome://settings/siteData to remove all third-party cookies and site data. – Mac, Windows, Linux, Chrome OS  
[#enable-removing-all-third-party-cookies](#)
- Cookies without SameSite must be secure**  
If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if "SameSite by default cookies" is also enabled. – Mac, Windows, Linux, Chrome OS, Android  
[#cookies-without-samesite-must-be-secure](#)

The screenshot shows the Chrome flags page at chrome://flags. Three flags are visible:

- SameSite by default cookies**: Description: Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android. Value: Disabled.
- Enable removing SameSite=None cookies**: Description: Enables UI on chrome://settings/siteData to remove all third-party cookies and site data. – Mac, Windows, Linux, Chrome OS. Value: Default.
- Cookies without SameSite must be secure**: Description: If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if "SameSite by default cookies" is also enabled. – Mac, Windows, Linux, Chrome OS, Android. Value: Disabled.

At the bottom, a message states: "Your changes will take effect the next time you relaunch Google Chrome." with a "Relaunch" button.

4

Finalmente, haga clic en "Relaunch"  
y se reiniciara el navegador.
