

AGREEMENT

Instituto Geofísico del Perú (IGP) has agreed the scientific team of Space Environment Research Center (SERC) and Faculty of Sciences, Kyushu University, Japan, use part of its facilities to carry out collaborative observations for the Field Research Program of "Study on the geo-space environment change by energy and momentum transfer from the solar wind into the equatorial ionosphere" (Project Leader; Prof. Dr. Kiyohumi Yumoto) under the following conditions;

1. Observation site

Observation site, which occupies a flat area of 50x50 m², will be established by IGP in the centre at Ancon, Canete, Piura and Guadalupe. The equipments will be installed in the rooms of 20 m² in order to measure magnetic field variations for the Circum-pacific Magnetometer Network (CPMN).

2. Observation period

Observation with the magnetometer is continued from April 2011 to March 2012, and this agreement is automatically renewed on April First every year unless one side does not wish to continue. When one party does not wish to renew it, they shall give a notice to other party by two months before the last day of observation period at the latest.

3. Operational costs

IGP will provide the basic expense for operations in the observation site. Kyushu University will pay annual fee of US\$ 1,080- (US\$ 90-/month x 12 months), for the use of the facilities, to IGP, Peru.

Instituto Geofísico del Perú and Kyushu University agreed the above, each other.
